SKILLS

DATA

Python / SQL / Pandas / NumPy

MODELING

Scikit-learn / TensorFlow / Deep Learning

BI & ETL

Power BI / Tableau / Talend / SQL Server

TOOLS

Spark / Git / UML / UI-UX

LANGUAGES

Arabic - Native

French - Fluent

English - Technical

Data Science & Artificial Intelligence Engineering Student

2027 FINAL-YEAR INTERNSHIP / DATA - AI - PRODUCT

01 PROFILE

Third-year engineering student at the National School of Applied Sciences of Fez. I turn real-world problems into clear analyses, models and digital products, connecting technical rigor with user needs.

02 EXPERIENCE

JUN - SEP 2026

Abajad AI

End-of-year project - Data & AI

Designed a video analysis agent, a student co-living MVP and an autonomous agent for final-year internship monitoring.

JULY 2025

LafargeHolcim Morocco

Introductory internship - Machine Learning

Prepared a 78-feature network dataset and compared models to classify normal and abnormal traffic.

03 EDUCATION

Engineering degree - Data Science & AI

National School of Applied Sciences of Fez / Expected graduation: 2027

04 KEY PROJECTS

- **Network anomalies** — MACHINE LEARNING
  Classification pipeline and model comparison across 78 features.
- **Bank fraud** — DEEP LEARNING
  Suspicious transaction detection based on 15 input features.
- **SNCF travel** — BI / ETL
  ETL with Talend and SQL Server, followed by a Power BI dashboard.
- **YUNEST** — PRODUCT / UI-UX
  Student co-living MVP: visual identity, user flows and mobile UI.

Available for a Data & AI final-year internship in 2027
